entreTime

... teaching through entrepreneurship

Klaus Sailer,
entreTime project
coordinator

"European Training Programme in Entrepreneurship for Educators (Service Contract EASME/COSME/2018/020)"

Editorial

entreTime is a new entrepreneurship education initiative funded by the European Commission. The service aims to upgrade the skills and pedagogical tools of educators within higher education institutions on this domain by providing a comprehensive training package. Following our distinctive philosophy which considers entrepreneurship as a unique pedagogical teaching method (“teaching through entrepreneurship”), a unique academic platform for spreading entrepreneurial teaching and co-creation also outside the traditional domain of business schools and economic faculties will be set up and validated within three years of activity engaging top- level educators across Europe.

What is new: A Pan-EU Train-the-trainers Programmes on Entrepreneurial Teaching benchmarking analysis

Given that Entrepreneurial training is becoming increasingly important in academia and business, entrepreneurship is a de facto interdisciplinary area that has drawn significant attention over the years with consequent a lot of different frameworks/approaches. entreTime consortium performed a benchmarking analysis on the most relevant programmes on entrepreneurship education in Europe and North America (54 entrepreneurship training packages) to identify success factors of the different approaches, new tools, and eventual gaps.

Under the spotlight: the first entreTime train-the-trainers pilot

Katarina Pramatar, ACEIn – AUEB
Dana Adriana Puia Morel – European Commission

On 17-18 September 2020, [the first entreTime Train-the-Trainers program](#) for Entrepreneurship was held at the Athens Center for Entrepreneurship and Innovation (ACEIn), part of the Athens University of Economics and Business. The vision behind the entreTime’s program is to train "all disciplines professors" and trainers, including those who do not have specific knowledge about entrepreneurship, to facilitate the adoption of new training methods/skills in their courses to develop Entrepreneurial Competences among the participants.

News from EntreComp

Bridging Design Thinking and EntreComp for Entrepreneurship Workshops: A Learning Experience

Design is commonly used in Entrepreneurship Education, however it’s capacity to support entrepreneurial competencies has not been explored sufficiently. A recent study performed an in-depth analysis of participants’ learning journeys in two early entrepreneurship events to gain a better understanding of this process and providing hints on how using EntreComp to add nuance to design interventions.

Entrecomp at work

Supported by the European Commission, the EntreComp (Entrepreneurship Competence Framework) has been adopted for the provision of services supporting individuals to progress towards the labour market or to better approach entrepreneurial ventures.

EntreComp at work includes 10 case studies providing insights into actual use of the framework for addressing the entrepreneurial skills challenge
